

December

Diving into December we will travel around the world and learn about different holidays that happen throughout the month. We will learn about Kwanzaa by cutting and mixing our own friendship salad to share and eat with each other. The next holiday on our journey is Hanukkah where we will experiment with various items to see if we can get them to spin like a Dreidel. To round out the week we will finish our tour around the world by celebrating Christmas. Friends will build a snowman by stacking lettered snowballs to build their first names. Students will build a Santa using construction paper and popped popcorn.

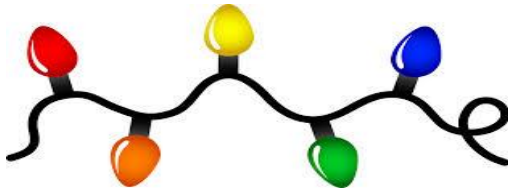

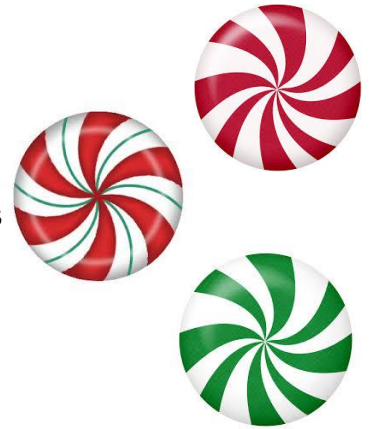

Get ready to pull out your gloves and hats because we are going to talk about winter. Students will decorate fuzzy mittens using shapes, sequins and cotton balls. Friends will also search through snow with shovels to find the letter of the week. After shoveling through snow we will sort colored balls by matching them to the snowman's colored buttons. To end the week we will discover what happens when you put salt on ice!

5, 4, 3, 2, 1....HAPPY NEW YEAR! The final week of December we will be talking about New Year's Celebrations. Children will match corresponding lettered party hats and create fireworks using salt and watercolor. We will experiment and create our own fireworks in a jar by mixing oil, water and food coloring. To end the celebration students will create a new years drum using paper plates, paint and beans. After we will count down and shake our drums to the New Year!
